

I did sign up for the "Don't Call" list and the bothersome calls are nil. I would like to have included in the bill, that even one might have dealings with a company, it shouldn't give them the right to bother the consumer. If I do business with a company, I know where to reach them. I don't need them to pester me. I hope that a bill for cell phones, with the same provisions, is introduced.

Thank you.
